

## **Clinic Background and Services Provided:**

At Pediatric Rehab by Wellness Care Centers we provide exceptional therapy for children with developmental disorders or delays. Our unique centers provide comprehensive rehab services for children from ages Birth to 21. Our team, along with the family, creates a customized program to maximize each child's potential. We are a ONE-STOP therapy spot!

### **Physical Therapy:**

Pediatric Rehab physical therapists have a deep understanding of the issues associated with the body and movement. There are many forms of treatment available, so it is imperative that our highly trained therapists fully assess each child and determine the proper form of treatment for the child and their specific needs.

### **Occupational Therapy:**

At Pediatric Rehab, we focus on the treatment of a child's cognitive, sensory, and physical disabilities to encourage growth. Our highly educated and skilled Occupational Therapists will give the child the steps necessary to be more independent, while maximizing their life skills and enhancing their natural abilities.

### **Speech Therapy:**

Children may have difficulty putting words together, producing sounds, or comprehending language. Language or Speech Pathologists are trained in the development of human communication. Our Speech Therapists understand speech disorders and the proper techniques to give the child the power to communicate more effectively.

### **Feeding Therapy:**

At Pediatric Rehab we provide comprehensive oral motor and feeding evaluations. Our therapists provide excellent intervention to help improve oral motor and swallowing difficulties associated with limited feeding abilities. Our goal driven team of therapists can help children develop typical, effective and safe feeding skills. At Pediatric Rehab we involve caregivers to help transition therapeutic skills into everyday use in order to promote progress and help make eating enjoyable.

### **Counseling and Social Services:**

Pediatric Rehab Social Workers will conduct research, advocate for services and assistance for the family and bridge the gap between children and their families. Our caring social workers will be a giant step in the right direction for the overall development of your child's ability to function in society.
