

Useful Information

Where to Park:

Park in front of building in the row furthest from the door in order to leave closer spaces for patient use. There are no reserved spaces.

Address: 111 Ferguson Court, Irving, TX 75062

Lunch:

Typically, we stay at the office for lunch and lunch time varies day-to-day so bring a lunch for sure the first day.

We have a fridge/freezer and a microwave available if needed.

There are a couple of eateries nearby, within 10-15 min drive.

Things to bring:

Writing utensil and notebook to take notes and jot down useful information.

Laptop to setup documentation system. (Mac or PC works)

Things to review:

PT:

Take some time to review normal development, not just gross motor, but all development.

Focus on Birth to 3 as it is most relevant and particularly relevant for children with disabilities. As far as protocols, we use the PDMS-2, BOT, and GMFM (less frequently).

Diagnoses - review CP of course, Spina Bifida, and then just general neuro, ie: low tone vs spasticity, etc.

Your best preparation will be having a good review on "normal" to help you spot what isn't.

OT:

Take some time to review normal development: gross motor, fine motor, cognitive, social, and sensory as well as the development of self-care, scissor use, progressing of writing grasps.

Focus on Birth to 3 as it is most relevant and particularly relevant for children with disabilities. As far as protocols, we use the PDMS-2, BOT, Pediatric Evaluation of Disability Inventory (PEDI), Sensory Profile, and Beery-VMI.

Diagnoses – Cerebral Palsy, Autism, Down Syndrome, Sensory Processing Disorder and other sensory-related issues, general neurological conditions (i.e.: low tone vs spasticity).

Your best preparation will be having a good review on "normal" to help you spot what isn't.
